DETAILED ACTION

1. Mailing of Letter Of Suspension and Indication of Allowability in Paper # 10 is vacated. Action on merits as follows:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Amborn et al. (6311462).

Amborn et al. Disclose an assembly for handling and packaging pharmaceutical dosage forms, including an infeed structure (22, fig. 1) for accepting a series of dosage forms including a surface (10, fig. 2) movable in a downstream direction (11, fig. 2), a laning structure (35, fig. 4) defining a plurality of lanes (40, fig. 4) extending in the downstream direction and having a downstream end (38, fig. 4), and a plenum structure (32, fig. 4) extending from the infeed structure (22) to the laning structure (35) including a guide portion (25, fig. 2) for guiding dosage forms carried by the surface into the laning structure, a form handling device (38, fig. 4) for receiving dosage forms and transporting dosage forms from the laning structure to a packaging device (90, fig. 4A), a dump gate (80, fig. 4) having a closed position wherein the dump gate blocks the

lanes at the downstream ends thereof, and an open position in which the dump gate does not block the lanes, and a time controller for opening the dump gate after the handling device receives dosage forms (see col. 7, lines 20-28), which meets all the claimed limitations.

Regarding claim 2, the timed controller further comprises a computer communicating with the form handling device and the dump gate (see col. 6, lines 20-30).

Regarding claim 3,the assembly further comprising a guide wall structure (14, fig. 5) defining the guide portion (25) and including a curved portion (45, fig. 3).

Regarding claim 4, the guide wall structure (14) also defines the plenum structure (32), the plenum structure including a plenum entry (28, fig. 4) and the guide wall structure being shaped to guide dosage forms so that dosage forms enter the plenum structure at the plenum entry adjacent a first side of the laning structure (35, fig. 4) and travel in a lateral direction transverse to the downstream direction toward a second side (47, fig. 4) of the laning structure before entering the lanes.

Regarding claims 5 and 6, the curved portion includes a movable member (60, fig. 10) and a biasing means (73, fig. 11) for vibrating it for reliving jamming of dosage forms.

Regarding claim 7, the laning structure (35) includes a surface for supporting the dosage forms slopping in the downstream direction to the dump gate (80) so that debris is carried out of the lanning structure (see col. 5, lines 63-66) by the surface when the dump gate is in open position.

Response to Arguments

4. Applicant's arguments filed 10/29/2003 have been fully considered but they are not persuasive. Upon reconsideration, applicant is not entitled to claim priority of the 371 application ((PCT/US99/05103, filing date 3/9/1999) or provisional application (60/077,363, filling date 3/9/1998) because there is no common inventor, see 35 USC 120 and 35 USC 119 (e).

5. 37 CFR 1.131 is also not applicable because the reference, 6,311,462 (Amborn et al.) is a U.S. patent or U.S. patent that claims the rejected invention. An affidavit or declaration is inappropriate under 37 CFR 1.131(a) when the reference is claiming the same patentable invention, see MPEP § 2306. If the reference and this application are not commonly owned, the reference can only be overcome by establishing priority of invention through interference proceedings. See MPEP Chapter 2300 for information on initiating interference proceedings. However, the effective filling date of application (12/27/2001) is more than 3 months after the effective filling date of Patent- 6311462 (3/9/1998), the applicant must proceed under 37 CFR 1.608(b), see MPEP 2308.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3721

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
